referring to the mark-ups in Appendix A.

25

1. (Amended) A method for designing a control of a complete process which
comprises a number of individual processes, said method comprising the steps of:
- a) identifying functionalities of said individual processes;
 - b) performing a validation by automatically verifying an interplay of said
functionalities in accordance with an input to said complete process, while not
impeding each individual process during an operation, producing a validation
result; and
 - c) determining data for controlling said complete process from said validation
result.
